**Subject:** [EXTERNAL]Fw: Williams Parkway from Dixie Road to Torbram

Hi Grace,

I'm a resident of [REDACTED] in the Williams Parkway from Dixie Road to Torbram study,

I have a few questions

I would like to be added to the mailing list. – Please be advised that you will be included in the Stakeholders List. This way you will be informed how the project progresses.

What is the expected completion date of the study? - Anticipated completion time is end of July 2023.

I would also like to know when I can expect the process of expropriating my home to start.

thanks

██████████

[REDACTED],

Thank you for your comments. We are still early in the study and are currently conducting a traffic study to assess future traffic conditions and needs, which will inform the improvements recommended to be moved forward. We acknowledge that we have heard from you and others on other sections of Williams Parkway that widening / additional lanes is not preferred. We also recognize the importance of the three schools in the study area and have reached out to them and the local school boards. The walls are noise walls for those who live directly adjacent to the street. We will be doing a noise study as part of this EA study to determine recommendations for noise mitigation.

We have added you to the study contact list and you will receive all future notices for this project. We will be better able to address your questions as the study progresses. A Public Information Centre will be held where we will be presenting the findings of these studies and the recommended design.

Thank you,  
Salina Chan, on behalf of the Williams Parkway EA Team

Subject: Williams Parkway review

I would like to be included in all items related to the Williams Parkway assessment.

I have lived very close to Williams Parkway for 30+ years , use it on a daily basis and have strong opinions regarding it being reassessed because the last time this was considered it was determined to widen the street and to tear down all the natural vegetation and construct concrete walls that are an eyesore in other sections of Williams Parkway west of Dixie. I would also point out that there are multiple schools between Dixie & Torbram that have restricted speed limits. IF traffic is increasing in this area I suggest that you review how many traffic lanes have been lost to bicycle lanes that no one uses in this area and maybe they should be better utilized as vehicle traffic lanes.. [REDACTED]

Hi [REDACTED]

Thank you for reaching out to City of Brampton. The city is currently continuing the conducting of the Environment Assessment (EA) project for Williams Parkway improvement between Dixie Rd and Torbram Rd and the noise assessment report is a part of this. However, at this time the report has not been finalized.

Regards,  
**Grace**

Hello

Has there been an update for the noise wall?  
It has been over a year since my inquiry.  
Waiting years does not seem like an acceptable solution.
