

MEET THE ARTIST

HOPE FLYNN

Hope Flynn is an emerging neurodivergent muralist passionate about creating public art that engages communities and raises environmental awareness. In 2021, she completed the Mural Routes "Introduction to Mural Art" program, which deepened her interest in murals and their impact. Since then, she has been commissioned to create vibrant animal murals and vinyl wraps across the Ontario, hopefully raising awareness about protecting our environment. Stormwater and environmental stewardship matter to her because the waterways are so vulnerable to pollution. The way people treat the environment directly impacts the wildlife she loves to paint, and she wants her murals to remind people of that connection. Through her murals, she hopes to encourage people to think about their role in protecting nature and take small steps toward making a difference.

ONLY RAIN WATER @ COASTLINE DRIVE

This design features a swan swimming through a body of water, leading her cygnets. The swan holds an open black umbrella with one wing, shielding herself from the raindrops falling from above; reinforcing the message that only rainwater should enter the drain. Through this mural, she hopes to inspire a sense of responsibility and care for our environment, protecting future animals like the cygnets in the painting.

KEEP OUR WATER CLEAN @ ABBOTSBURY DRIVE

This design depicts a natural pond scene with a great blue heron, duck with her duckling, and three fish swimming in a flowing stream. The bold text, "What Goes Down, Comes Around, Keep Our Water Clean," is written inside the white cloud on top of the concrete, visually representing the water cycle and how contaminants can return to the environment. The overall message highlights the responsibility of protecting waterways from harmful waste.
