## JULIA LOUISE PEREIRA

Meet Julia Louise Pereira, one of the six artists painting 12 catchbasin murals around Brampton. Julia is a multidisciplinary artist who prioritizes capturing the beauty and wonder in nature by creating colorful and whimsical illustrations. For these catchbasin murals, she wanted to communicate that everything is connected, that our storm-water systems are a direct channel to the wildlife that lives in Brampton. She believes that by protecting our environment and the animals that rely on our stewardship, we can make our city a more beautiful and healthy place to live.

### SAVE OUR WATER

#### @ BALMORAL DR

The first mural depicts stylized Redside Daces, a Northern Pike, an American Eel, and a Small-mouth Bass erupting from the drain system in a flood of water, foam and bright plant life. At the base of the design is the text “Save Our Water.”

### KEEP OUR HOME CLEAN

#### @ BURNLEY PL

The second mural has stylized Redside Daces and American Toads swimming in a pond with colorful plant life emerging from the drain system. At the top of the design is the text, “Keep Our Home Clean.”
